

Wireless alarm & CCTV course – BOOK NOW

We are absolutely delighted to announce we have our 1 day course on how to install wireless alarm, CCTV and many other systems.

We have a partnership with "Response" who are the UK's leading wireless security company. Check them out on www.responseelectronics.com to see their many products.

The course teaches alarm installation utilizing the very latest up to date technology in alarm systems and CCTV. With the alarms being a wireless system there are many advantages over the wired version to the customer. The other advantages are of course you do not need specialist electrical qualifications and there is a maintenance contract available changing batteries and servicing etc. We also cover many other electrical security solutions on the leading edge of the market today including intercom systems and other products solely available through Response some of which have been seen on the BBC hit show Dragons Den and T.V's gadget show.

The price is only £300 incl Vat for the course benefitting you with trade prices on all the products. A good alarm system can be purchased using the discount for around £130, Supplied and fitted equates to £250+ giving a whopping £120 profit taking only an hour from start to finish for installation.

All the products will give you a fantastic profit margin. As well as the possibility of annual maintenance contracts.

As an extra back up to our tuition you will receive a superb user friendly DVD which gives you step by step instructions on how to fit the products as well six 24/7 help-lines straight through to the manufacturer so you'll never get caught out with a problem.

Response are at present finding it hard to meet demand of sales due to lack of engineers.

Courses are held at training centre from 08:30 – 16:00.

Trusted and Vetted

1 Day Technicians Course

The UKWSA 1 day technicians course covers many of the non hard-wired security options on the market today using products from the leading supplier Response Electronics.

The reason we have chosen a wireless course is to make it both easier and cheaper for you the technician. As there is no hard wiring of the electrics you do not need to be Part P or Mains compliant qualified.

Wireless systems especially alarms have come along way in recent years and now offer extremely high protection as well as benefits over wired systems such as lack of tracing wires around the property and under carpets as well as the fact that wires especially under carpets will over time break down causing false alarms. For the technician another major advantage is that you can charge for a maintenance program including changing batteries in the system.

The course covers many forms of electrical security including but not limiting to three different alarm systems, CCTV, Intruder lighting systems and many new items such as Fake T.V, Intercoms etc.

The course also covers Lorry trailer alarms made to not only protect cargo but prevent illegal immigration and the hefty fines that come with it.

Lunches as well as refreshments through out the day are included in the price of £300 and takes part in our purpose built training centre. Where on the course we also cover ladder safety for yourself and others.

All Technicians who complete the course are automatically entered onto the response database for work they have in your area and a discount of up to 20% on all of their systems raising your profit margins even higher. Full UKWSA certification will be given to the candidate.

The course is a hands on course with no written work and would be a fantastic string to any locksmiths bow or even as a stand alone company.

Itinerary

- 0830 – Arrive at training centre. Welcome and Health and safety talk.
- 0845 – Ladder safety. Including ladder maintenance, correct pitch, taking a ladder lock and using tools whilst on a ladder.
- 0900 – Introduction to alarm components of the Bronze alarm.
- 0930 – Syncing and installation of the Bronze level alarm system.
- 1015 – Completing a factory reset of the Bronze Level alarm.
- 1025 – Introduction to alarm components of the Silver level alarm system.
- 1050 – Syncing and installation of the Silver level alarm system. Including changing access codes.
- 1130 – Complete a factory reset of the Silver level alarm system.
- 1200 – Lunch
- 1245 – Introduction to the Platinum level control panel.
- 1315 – Syncing and installation of the Platinum level alarm system. Including zone setting and dial out features.
- 1410 – Complete a factory reset of the Platinum level alarm system.
- 1430 – Introduction to the Wireless CCTV systems.
- 1445 – Installation of the Wireless CCTV systems.
- 1500 – Miscellaneous electrical security.
- 1540 – Certificate presentation.
- 1600 – Course ends.

Once the applicant becomes a technician they will have the option of becoming a member of the UKWSA which will not only aid them with getting work but will give their clients the piece of mind of a trusted and vetted scheme. This is a big bonus as a lot of alarms fitted are to recently burgled premises when the client is being more security conscious and feeling more vulnerable than ever. We can also supply the minimal tools required at a discounted rate if required.
